SECUVANT
Cyber Security | Risk Management

Because Superior Compliance is the Only Answer for Your Organization

Audit and Assessment Services based on a variety of global standards, frameworks and regulations.

Gap & Advisory Services

Customized advisory and assurance services which help organizations assess compliance and identify remediation activities which support organizational growth and security.

Information Security Program Management

Providing a spectrum of services associated with the development, implementation and ongoing execution of information security and compliance programs we enable organizations to focus on core competencies while we provide expertise in a variety of areas including information security, privacy and risk management.

Security Awareness Training

We deliver client-focused and cloud-enabled security awareness training

Vulnerability Scanning

We deliver managed vulnerability scanning for your internal and external IP Addresses and Ranges on a cadence aligned with your company's business and compliance needs. You get to choose the schedule, we provide the scan results and remediation recommendations. The risks are prioritized allowing for ease of remediation. Continual vulnerability assessment is the foundation of a proactive cybersecurity operation, moving beyond reactive measures like firewalls to improve the ability to address future incidents.
