

SECUVANT™ OVERVIEW

- Secuivant™ provides complete security risk management and independent cybersecurity managed services:
- Business-first approach to security risk management and cyber defense
 - Enterprise-grade security at a small/medium business price
 - Security maturity modeling, baselining, and risk assessments
 - Co-managed 24x7 Managed Security Operations (SecOps) tactical and technical services
 - Security program assessment, development, management, and operations
 - Product agnostic security services: Secuivant™ **doesn't sell hardware or software**

PRIMARY SECUVANT™ SERVICE OFFERINGS

- **Security Gap Risk Analysis and Program Development:** Utilize Secuivant's business-risk methodologies to document security gaps, calculate maturity scores, make security program recommendations, and develop realistic roadmaps.
- **Co-Managed Security Operations:** Complete co-managed Security Operations (SecOps) services utilizing client and Secuivant™ resources, providing real-time monitoring of security risk with cloud-based SOC, vulnerability and network monitoring, 24x7 management by Secuivant™, and a dedicated Secuivant security team.
- **Cyber Risk Program Management:** Supplements our co-managed SOC and gap analysis offerings by providing a framework and expertise for short, mid, and long-term cyber risk management planning and execution.

BUSINESS IMPACT DRIVES SECURITY RISK DECISIONS

Secuivant™ understands business objectives drive cybersecurity decisions, and not the other way around. Secuivant's methodologies correlate corporate goals and business priorities likely to be impacted by cybersecurity. Secuivant™ bridges the business and technical gap of cyber risk. We work with your team to ensure cybersecurity investments **PROTECT** and **ENABLE** your business. Secuivant™ brings a business-first approach that...

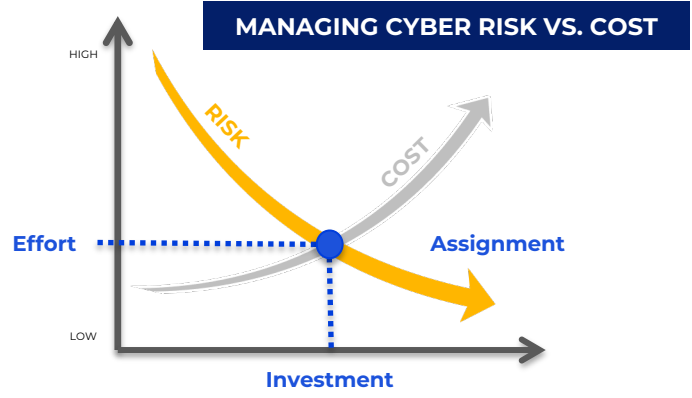

- **BRIDGES** the gap between business and technology impact
- **ALIGNS** cyber investments with business objectives and priorities
- **SUPPLEMENTS** understanding of risk for informed decision making
- **PROVIDES** independent analysis of current security effectiveness
- **CORRELATES** clients' security posture against Secuivant's Security Maturity Model for comparison against peer groups, industry standards, and best practices
- **CREATES** multi-year cybersecurity program roadmaps, including short-term/high-value and low-effort/low-cost recommendations
- **ACHIEVES** the optimal risk and cost intersection point based on effort and investment
- **ADVISES** which tool maps to prioritize business risk without bias

FREQUENTLY ASKED QUESTIONS (FAQs)

- What makes Secuivant™ unique?** Secuivant™ is an independent firm focused on defending the organization and enabling business through a calculated cyber risk decision-making process.
- What is the Secuivant™ Security Maturity Model?** Based on industry standards, Secuivant™ finds gaps and vulnerabilities, then maps them to business needs and goals. We provide a maturity score, that becomes the baseline of where to start and how to lower risk and costs over time.
- What if I already have security covered?** Many companies "don't know what they don't know" in terms of security. It is not about the tools, AND compliance isn't security. All companies have risks, we show you how to lower them at the lowest possible cost.
- Does Secuivant™ do penetration testing and auditing?** Yes, but for mid-sized companies, we recommend spending limited resources reducing gaps and risks as opposed to testing known deficiencies.
- How does Secuivant™ lower my security risks?** Through visibility and expertise. Secuivant's cybersecurity team finds cyber risks impactful to your business then helps mitigate or assign those risks.

- Cannot achieve 100% cyber risk elimination
- The Law of Diminishing Returns is applicable in cybersecurity
- Optimization point found through analysis and facts
- Find business impact of risk and leverage current investments
- Assign risk beyond optimal effort and investment point (e.g., cyber liability insurance)
